Configuraciones con Simbología

Indicaciones Generales

1. Desempacar y Acomodar piezas

Abrir cajas y sacar todos los contenidos. Colocar las piezas sobre el suelo en el área final donde se va a instalar el mueble. Se sugiere poner las piezas y uniones tal cual se armaran.

2. Leer Instructivo

Se sugiere leer este instructivo por completo antes de comenzar a armar para comprender el proceso de ensamble y uso de las Piezas, Uniones y Accesorios.

3. Armar Estructura Metálica

Utilizando los Tornillos M10 empezar a atornillar todas las piezas para formar la estructura metálica: Marcos, Uniones y Patas. Se sugiere primero atornillar todas las piezas en su lugar sin apretar y después al verificar que todo esta presente, regresar y atornillar todo firmemente a tope. Antes de continuar asegurarse que la estructura este firme y estable ya que al proceder no se podrán volver a apretar estos tornillos.

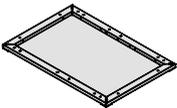

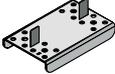

4. Colocar Cubiertas

Colocar las cubiertas en posición sobre la estructura metálica. Atornillar las cubiertas al marco utilizando 6 tornillos M6 por cubierta.

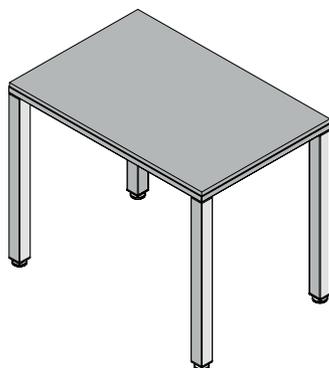

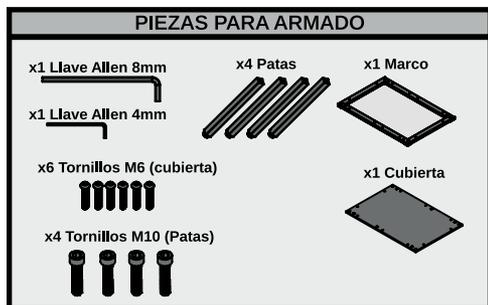

5. Colocar los accesorios

Colocar y atornillar el resto de los accesorios en la siguiente orden: Mamparas, canaletas, etc.
